Plaintiffs,

V.

17 NATIONAL COLLEGIATE ATHLETIC
18 ASSOCIATION, an unincorporated association,

Defendant.

CASE NO. 1:23-cv-00425-WBS-KJN

CLASS ACTION

AMENDED CLASS ACTION COMPLAINT

JURY TRIAL DEMANDED

1 Plaintiffs Joseph Colon, Shannon Ray, Khala Taylor, Peter Robinson, Katherine Sebbane,
2 and Patrick Mehlert (collectively “Plaintiffs”), on behalf of themselves and all others similarly
3 situated, bring this class action complaint alleging antitrust violations and allege as follows:

4 **INTRODUCTION**

5 1. Defendant National Collegiate Athletic Association (“NCAA” or “Defendant”) and
6 its member schools have engaged in an illegal wage-fixing conspiracy to exercise the NCAA’s
7 admitted monopsony market power¹ in the labor market for coaches. They agreed, through a binding
8 NCAA bylaw, to fix the compensation of an entire category of college coaches at zero. Persons were
9 hired as coaches by NCAA member institutions, but the schools were prohibited by an NCAA Rule,
10 to which all member institutions agreed to abide, from paying them anything for their work. The
11 rule was abandoned in January 2023 (effective July 1, 2023). But the past economic damage suffered
12 by coaches who were required to work for no pay remains and the depression of salary levels, which
13 was the purpose and effect of the Rule, is likely to continue.

14 2. Just as the NCAA member schools compete during events, they also compete with
15 each other in the labor market for coaches. For years, Defendant and its member schools have agreed
16 to a bylaw that has restricted NCAA Division I schools to a limited number of paid coaches in each
17 sport. Defendant and its member schools have also agreed in another bylaw to allow the member
18 schools (except in football and basketball) to hire one or more additional coaches (depending on the
19 sport). But on the recommendation of the aptly named “Cost Reduction Committee,” the NCAA
20 and its member schools agreed to cap the compensation that schools may provide these additional
21 coaches, and they set that cap at \$0.

22 3. The NCAA bylaws, which have been recognized as constituting a binding agreement
23 among all the member schools, refer to these coaches as “Volunteer Coaches.” In reality, that means
24 that skilled coaches who are desired by NCAA schools, but not employed as regular (paid) coaches,
25 must provide very valuable services to the schools for free, or not be employed in their profession

26
27

¹ *Nat'l Collegiate Athletic Ass'n v. Alston*, 141 S. Ct. 2141 (2021).

1 of choice. Even if one were the most desirable of such coaches, no member school could offer him
2 or her any salary in order to compete for their services. These volunteer coaches frequently work
3 full time, weekends, early mornings, and late nights and perform many, if not all, of the same job
4 duties as the paid coaches working out of the same set of Athletic Department offices. Yet the
5 volunteer coaches cannot even receive health insurance, housing, or other benefits, much less an
6 actual salary in exchange for work performed. Advantaging themselves of the career aspirations
7 and love of sport which these coaches bring to their institutions and the student athletes they coach,
8 the NCAA and its member schools abuse their monopsony power by agreeing all will accept the
9 benefits these coaches bring to their respective institutions and student athletes but to pay the
10 coaches nothing for it. The so-called volunteer coach may, indeed, be the only uncompensated
11 employee at the institutions where they work. Absent the wage-fixing conspiracy alleged herein,
12 these unpaid coaches would be compensated at the market rate and commensurate with their co-
13 workers, or at a bare minimum, at the rate required by state and federal wage-and-hour laws.

14 4. These agreements among Defendant and its member schools, in antitrust terms, make
15 the member schools a buyer-side cartel: a group of competitors agreeing to abide by naked
16 horizontal pricing restraints to purposefully restrict competition in the labor market for valuable
17 college coaching services so they can collectively reduce their costs. The very purpose and actual
18 effect of this horizontal agreement was to fix and suppress salaries so as to make them unresponsive
19 to a competitive marketplace or even one in which basic wage-and-hour laws are respected. This
20 amounts to an unlawful restraint under Section 1 of the Sherman Act, 15 U.S.C. § 1.

21 5. A similar but less draconian NCAA rule regarding a category of so-called “restricted-
22 earnings” coaches was invalidated over 20 years ago in *Law v. N.C.A.A.*, 134 F.3d 1010 (10th Cir.
23 1998), and was found so plainly unreasonable that it could be condemned as illegal under the Section
24 1 Sherman Act “quick look” rule of reason test. The only difference between *Law* and the present
25 action is that restricted-earnings coaches could be paid up to \$16,000 per year; these coaches may
26
27

1 not be paid anything.² After granting summary judgment to the Plaintiff coaches on liability under
2 Section 1, the *Law* case and the coordinated *Schreiber v. NCAA* (baseball) and *Hall v. NCAA* (all
3 other sports) cases were tried together to a jury on the question of damages in the District of Kansas.
4 That jury returned verdicts for all three classes of coaches.

5 6. This suit seeks to recoup the damages sustained by the plaintiff class of volunteer
6 coaches in sports (other than baseball) as to which the “volunteer coach” rule applies as a result of
7 these collusive and illegal practices. It seeks actual and treble damages under the Clayton Act and
8 injunctive relief. Although the Volunteer Coach rules have recently been abrogated, at least for now,
9 given the history of the *Law* case and this one, plaintiffs seeks to enjoin the NCAA and its members
10 from engaging in this conduct again, so that these or future talented coaches are fairly compensated
11 for valuable work performed.

PARTIES, JURISDICTION, AND VENUE

13 7. Plaintiff and Proposed Class Representative Joseph Colon is currently a resident of
14 Chicago, Illinois. He worked as a wrestling coach from approximately 2017 - 2020 at Fresno State
15 University. During this time, he was designated a volunteer coach. While it employed Mr. Colon,
16 Fresno State's wrestling team competed in Division I.

17 8. Plaintiff and Proposed Class Representative Shannon Ray is currently a resident of
18 Orlando, Florida. She worked as a track and field coach from 2019 until 2021 at Arizona State
19 University. During this time, she was designated a volunteer coach. While it employed Ms. Ray,
20 Arizona State's track and field team competed in Division I.

21 9. Plaintiff and Proposed Class Representative Khala Taylor is currently a resident of
22 Oakland, California. She works as a softball coach at San Jose State University from approximately
23 2022 to the present. During this time, she was designated a volunteer coach. While it employed

²⁵ ²⁶ ²⁷ ² The term “volunteer coach” is used throughout this Complaint because that is how the wage-fixed position at issue in this case is referred to in the NCAA’s bylaws. It is a misnomer of course; no coach “voluntarily” agrees to forgo an available salary for the position; they are required to forgo pay for work as a condition of employment. The Volunteer Coach rule is, in every sense, simply another version of the “restricted earnings” coach rule which was invalidated in *Law*. The Volunteer Coach rule restricts earnings at zero.

1 Ms. Taylor, San Jose State's softball team competed in Division I.

2 10. Plaintiff and Proposed Class Representative Peter Robinson is currently a resident of
3 Austin, Texas. He worked as a swimming and diving coach at the University of Virginia from
4 approximately 2019 to 2021. During this time, he was designated a volunteer coach. While it
5 employed Mr. Robinson, the University of Virginia's swimming and diving teams competed in
6 Division I.

7 11. Plaintiff and Proposed Class Representative Katherine Sebbane is currently a
8 resident of Atlanta, Georgia. She worked as a softball coach at the University of Pittsburgh from
9 2019 until 2021. During this time, she was designated a volunteer coach. While it employed Ms.
10 Sebbane, the University of Pittsburgh's softball team competed in Division I.

11 12. Plaintiff and Proposed Class Representative Patrick Mehlert is currently a resident
12 of Washington, D.C. He has worked as a men's soccer coach at American University from 2019 to
13 the present. He was designated a volunteer coach from 2019 to 2021. While it employed Mr.
14 Mehlert, American University's soccer team competed in Division I.

15 13. Defendant NCAA is an unincorporated association that maintains its principal place
16 of business in Indianapolis, Indiana. It has approximately 1,100 member schools. Its membership
17 includes most of the public and private universities and colleges that conduct athletic programs in
18 the United States. The NCAA's member schools are organized into three Divisions—Divisions I,
19 II, and III—based on the number and quality of opportunities they provide to participate in
20 intercollegiate athletics. The NCAA's Division I rules, codified in the NCAA Manual, are binding
21 on its member institutions which agree to abide by them. The NCAA and its member institutions
22 have a substantial presence in California and in this District and the volunteer coach rule has
23 impacted a large number of coaches in California and in this District. Considering its Division I
24 institutions alone, approximately 24 of them, participating in at least six different conferences, are
25 located within the State of California. No other state is home to more Division I schools than
26 California. Several Division I schools, including the University of California at Davis, Sacramento
27 State University, the University of Pacific, and Fresno State University, who compete in the Big
28

1 West, Big Sky, West Coast, and Mountain West conferences, respectively, are located in this
2 District. Those member schools have participated in the NCAA cartel that has enacted the illegal
3 horizontal restraint at issue in this case in that, those institutions, on information and belief, have,
4 like the other member institutions, collectively employed significant numbers of coaches pursuant
5 to the NCAA volunteer coach rule. This includes one of the Plaintiffs in this action and the Plaintiff
6 in a related action pending in this District, *Smart v. NCAA*, Case 2:22-cv-02125-WBS-KJN
7 (“*Smart*”).

8 14. Various other persons and entities, including NCAA member schools, engaged in
9 concert with the named Defendant in the conduct alleged herein, and are co-conspirators.

10 15. Plaintiffs bring this class action pursuant to §§ 4 and 16 of the Clayton Act, 15 U.S.C.
11 §§ 15(a) and 26, for violations of § 1 of the Sherman Antitrust Act, 15 U.S.C. § 1. This Court has
12 subject matter jurisdiction under 28 U.S.C. §§ 1331 (federal question) and 1337 (commerce and
13 antitrust regulation).

14 16. The Court also has subject matter jurisdiction under 28 U.S.C. § 1332(d) because the
15 amount in controversy exceeds \$5,000,000 in this class action, and some members of the Proposed
16 Class are citizens of a state different from the Defendant.

17 17. Defendant’s conduct had a direct, substantial, and reasonably foreseeable effect on
18 interstate commerce. Defendant and its member schools transact substantial business in multiple
19 states. Defendant and its member schools routinely use instruments of interstate commerce, such as
20 interstate railroads, highways, waterways, wires, wireless spectrum, and the U.S. mail, to carry out
21 their operations.

22 18. Venue is proper in this District because Defendant and/or some of its members
23 reside, are found, and have agents in this District as provided in 28 U.S.C. § 1391(b) and (c) and in
24 § 4 of the Clayton Act, 15 U.S.C. § 15. Alternatively, venue is proper under § 12 of the Clayton Act,
25 15 U.S.C. § 22, because Defendant and some of its members can be found in this District or transact
26 business in this District. A substantial part of the events or omissions giving rise to Plaintiffs’ claims
27 occurred in this District. The bylaw at issue applies to volunteer coaches who have worked, or

1 presently work, for NCAA member institutions in this District, and the NCAA sanctions Division I
2 events that regularly take place in this District, including events played by local members and
3 members of the Proposed Classes in this case and *Smart* reside or work in this District.

4 19. This Court has personal jurisdiction over Defendant pursuant to Section 12 of the
5 Clayton Act, 15 U.S.C. § 22, for the same reason that venue is proper under that Clayton Act
6 provision. It also has personal jurisdiction because, among other things, Defendant transacts
7 substantial, continuous business in this State and District; participates in organizing intercollegiate
8 athletic contests that take place in this State and District, as well as licensing and selling merchandise
9 and products in this State and District, and profiting from televising NCAA-sanctioned events that
10 take place in this State and District; it has substantial contacts in this State and District and several
11 of its members reside in this State and District; and it is engaged in an illegal anti-competitive
12 scheme that was directed at, and had the intended effect of causing injury to, persons residing in,
13 located in, or doing business throughout the United States, including in this State and District.

CLASS ACTION ALLEGATIONS

15 20. Plaintiffs bring this action pursuant to Federal Rule of Civil Procedure 23, as a class
16 action on behalf of the following:

17 All persons who, from March 17, 2019, to June 30, 2023, worked for an NCAA
18 Division I sports program other than baseball³ in the position of “volunteer coach,”
as designated by NCAA Bylaws.

19 21. While Plaintiffs do not know the exact size of the Proposed Class, Plaintiffs are
20 informed and believe that the Proposed Class includes over 1000 members residing in various parts
21 of the United States. The class is so numerous that joinder of all members is impracticable.

22 22. Plaintiffs' claims are typical of the claims of other members of the Proposed Class.
23 Plaintiffs and the members of the Proposed Class were subject to the same or similar employment
24 restraints and compensation practices arising out of Defendant's common course of illegal conduct.

³ Plaintiffs in this action exclude baseball coaches because their claim is being asserted in *Smart*.

1 Plaintiffs and the Proposed Class have sustained similar types of damages as a result of these
2 common practices.

3 23. Common questions of fact or law exist, and they predominate over any
4 individualized questions. They include, inter alia:

- 5 a. Whether Defendant's conduct violates the antitrust laws;
- 6 b. Whether by enacting and implementing the volunteer coach bylaws,
7 Defendant and its member schools engaged in a contract, combination, or
8 conspiracy to unreasonably restrain trade by capping the amount of
9 compensation paid to an entire category of coaches;
- 10 c. Whether that conduct caused Plaintiffs and Proposed Class members to earn
11 less than what they would have in a truly competitive market;
- 12 d. Whether that conduct caused the Plaintiffs and Proposed Class members to
13 earn less than what they would have absent the restraint, including under
14 federal and state wage-and-hour laws;
- 15 e. Whether Plaintiffs and the Proposed Class suffered antitrust injury or were
16 threatened with injury; and
- 17 f. Whether Plaintiffs and the Proposed Class are entitled to damages and
18 injunctive relief, and the type and scope of that relief.

19 24. Plaintiffs will fairly and adequately protect the interests of class members in that their
20 interests are aligned, and Plaintiffs have retained counsel competent and experienced in antitrust
21 class-action litigation.

22 25. A class action is superior to other methods of adjudication. Joinder is impracticable,
23 and the prosecution of separate actions by individual class members would impose heavy burdens
24 upon the courts and Defendant and create a risk of: (a) inconsistent or varying adjudications with
25 respect to individual members of the class which would establish incompatible standards of conduct
26 for Defendant; and (b) adjudications with respect to individual members of the class which would
27 as a practical matter be dispositive of the interests of other members not parties to the adjudications

1 or substantially impair or impede their ability to protect their interests.

2 26. Conversely, a class action would, as it did in *Law*, save time, effort, and expense and
3 assure uniformity of decisions for persons similarly situated without sacrificing procedural
4 unfairness or any undesirable result. Plaintiffs do not anticipate any difficulty in the management of
5 this action as a class action, and the Proposed Class has a high degree of cohesion.

6 27. Defendant has acted or refused to act on grounds generally applicable to the class,
7 thereby making appropriate final injunctive relief with respect to the class as a whole.

8 FACTUAL ALLEGATIONS

9 A. The NCAA and College Sports.

10 28. The NCAA has grown to include some 1,100 member schools, organized into three
11 divisions: Division I, Division II, and Division III. Division I schools are those with the largest
12 athletic programs, and those schools must sponsor at least fourteen varsity sports teams to qualify
13 for Division I. Division I has about 350 members.

14 29. College sports have enjoyed tremendous revenue growth over the last two decades.
15 In 2021, the NCAA itself earned \$1.15 billion. In 2022, the NCAA itself earned \$1.14 billion. That
16 does not include the amount earned by the NCAA's members individually. In 2019, the NCAA
17 Division I member schools generated close to \$16 billion in athletics revenue collectively.

18 30. The president of the NCAA earns nearly \$4 million per year; commissioners of the
19 top conferences earn between \$2 to \$5 million per year, and college athletic directors average more
20 than \$1 million annually.

21 31. The Division I sports programs implicated in this lawsuit are booming too. For
22 example, last year's 17-game Women's College World Series on ESPN averaged 1.2 million
23 viewers per game, with the most viewed game averaging 2.1 million viewers. The NCAA volleyball
24 final drew an ESPN record 1.2 million viewers, and the single-game, regular-season attendance
25 record was set twice back in September. And in 2021, 27,304 athletes competed in indoor track and
26 field and another 30,425 in outdoor track in all college divisions according to several NCAA
27 statistics. When the 2022 NCAA Track and Field Championships were held in Oregon last spring,

1 170 schools had entries. In the Division I outdoor preliminaries, a total of 4,224 athletes competed.
2 For the finals, 648 men and women competed, respectively, while another 336 men and women
3 competed in the indoor championships.

4 32. According to the NCAA Sports Sponsorship and Participation Rates Report
5 (Updated: October 27, 2022), excluding football, basketball, and baseball, men's sports fielded
6 Division I teams in approximately 20 sports in 2020-21 including: cross country (313 teams), golf
7 (295 teams), ice hockey (61 teams), lacrosse (73 teams), soccer (202 teams), swimming and diving
8 (131 teams), tennis (238 teams), track, indoor (265 teams), track, outdoor (288 teams), and wrestling
9 (77 teams). During the same time, women's sports fielded Division I teams in approximately 25
10 sports including: cross country (347 teams), field hockey (77 teams), golf (263 teams), lacrosse (118
11 teams), rowing (83 teams), soccer (335 teams), softball (294 teams), swimming/diving (190 teams),
12 tennis (300 teams), track, indoor (329 teams), track, outdoor (339 teams), and volleyball (333
13 teams).

14 **B. The illegal unpaid coaching position.**

15 33. Among the three divisions of competition into which NCAA member teams are
16 organized, the most talented athletes and the most highly paid coaches at the collegiate level are
17 concentrated in Division I sports. Division I schools provide the greatest number and highest quality
18 of opportunities to participate in intercollegiate athletics because they sponsor more sports teams
19 and provide more financial aid to student-athletes than schools in Divisions II and III. Division I
20 schools also provide student-athletes the greatest opportunity to compete against the highest caliber
21 opponents, to be coached by the highest quality coaches, to obtain access to the highest quality
22 training and equipment, to appear on television, to build towards a career in professional sports or
23 in coaching at any level, and more.

24 34. The NCAA together with its members have long adopted and enforced rules that
25 regulate college sports. These rules concern everything from how the games are played to standards
26 of amateurism to rules governing the size of athletic squads and coaching staffs.

27 35. To pursue their competitive goals, the NCAA's member institutions compete with
28

1 each other in hiring coaches for their Division I athletic teams. NCAA Division I member schools
2 compete to hire coaches who will help improve the performance of their teams, teach valuable skills
3 to players, foster a culture conducive to competitive success, recruit the best players, earn revenue
4 through ticket sales and television contracts, and attract donations from alumni—all with the goal
5 of elevating the overall profile of the school. The right coaching staff can be the difference between
6 mediocrity and establishing a dynasty in a particular sport. Because of their importance to their
7 schools, some head coaches command salaries in the millions; for example, the head softball coach
8 at the University of Oklahoma currently earns an annual salary of approximately \$1.625 million.
9 Some wrestling and track coaches—such as the head wrestling coach at the University of Iowa and
10 the head track coach at the University of Georgia—earn salaries of more than \$500,000. Many paid
11 assistant coaches at top Division I schools are paid hundreds of thousands of dollars.

12 36. NCAA member institutions place importance on the hiring of coaching staffs which
13 will make their programs competitive and help draw high-level players to their institutions.
14 Coaching staffs, which are limited in size by NCAA rules, have grown substantially over the last
15 several decades, as more coaches allow more attention to each player, or each aspect of the sport.
16 A competitive program will, in turn, elevate the overall profile of the institution and allow the
17 institution to benefit in many ways, including financially, according to higher visibility of the
18 institution, and increasing the number of undergraduate applications.

19 37. An individual wishing to pursue a Division I coaching career has no choice but to
20 seek employment at an NCAA member institution; these member institutions are the market.

21 38. In a properly functioning labor market, each Division I school would openly compete
22 for head and assistant coaches and pay them the salaries that the market commanded, and that the
23 school's emphasis on that sport suggested as reasonable.

24 39. The member schools compete vigorously for head coaches and assistant coaches on
25 compensation, which is why salaries of both categories have increased. For example, according to
26 reporting by USA Today, compensation to softball coaches at schools in the five biggest conferences
27 increased by an average of about 62% from 2013 to 2018.

1 40. Despite this thriving labor market, or perhaps because of it, the NCAA and its
2 member schools have illegally agreed to fix the compensation for one of the assistant coaches
3 authorized by the Division I bylaws—and they have agreed to fix that compensation at \$0. This
4 artificial restraint prevents one of the assistant coaches from receiving compensation in accordance
5 with what the open market, and at a bare minimum, wage and hour laws, would otherwise dictate.
6 Absent this restraint, the NCAA’s member schools would compete for talent for this unpaid
7 coaching position the same way they compete for talent for the other three coaching positions—on
8 salary and benefits. Instead, this artificial restraint prevents these unpaid assistant coaches from
9 being paid the fair market value of their worth to the team and university or even wage-and-hour
10 law minimum wages. It is a price fix, pure and simple.

11 41. The NCAA and its member schools reached and enforce this price-fixing agreement
12 in their bylaws. The NCAA constitution provides that member schools can enact legislation that
13 governs the conduct of the members' athletic programs. The member schools agree to administer
14 their athletics programs in accordance with the constitution, bylaws, and other legislation made by
15 the association, even if they disagree with it and vote against it. None of the member schools could
16 have paid one penny to any class member without running afoul of NCAA regulations and being
17 sanctioned.

18 42. The bylaws and related legislation are thus proposed, drafted, voted upon, agreed
19 upon, and implemented by NCAA members, who are horizontal competitors in the market at issue.

20 43. The bylaws state that nobody other than a coach may provide sport-related
21 instruction to a student-athlete or make tactical decisions during practices and games. In softball,
22 for example, only coaches may throw batting practice, catch bullpen sessions, lead fielding drills,
23 lead baserunning drills, and provide tactical or technical instruction to student-athletes during
24 practices and games. In all sports subjected to the NCAA's volunteer coach restraint, non-coach
25 staffers affiliated with a program are prohibited from engaging in those types of on-field or on-court
26 activities.

27 44. The bylaws authorize programs in each sport to hire a specific number of coaches.

1 Division I bylaws 11.7.6 and 11.7.6.2.3 establish that within those caps a school may hire a
2 “volunteer coach” whom they shall be prohibited from paying.⁴

3 45. Through these bylaws, the NCAA and its member schools have agreed to set every
4 volunteer coach's salary at \$0, just as they had agreed to cap the total compensation for the
5 "Restricted Earnings Coach" at \$16,000 in the Rule found to be illegal in *Law* and related cases. In
6 particular, the bylaws state that the "volunteer" coach may "not receive compensation or
7 remuneration from the institution's athletics department or any organization funded in whole or in
8 part by the athletics department or that is involved primarily in the promotion of the institution's
9 athletics program (e.g., booster club, athletics foundation association)." The net effect is that
10 schools are authorized to hire a certain number of coaches, but have agreed not to pay a subset of
11 those authorized coaches. In men's wrestling, for example, the bylaws allow member schools to
12 hire four coaches but allow them to pay only three of those coaches.

13 46. In addition to setting the volunteer coach's salary at zero, the same NCAA bylaw
14 prohibits the volunteer coach from receiving more than two complimentary tickets (i.e., for friends
15 or family) to home sporting events and prohibits the coach from receiving *any* tickets to other sports
16 events hosted by the school (i.e., basketball or football). It also does not allow for meals to be
17 provided, other than for "meals incidental to organized team activities (e.g., pre- or postgame meals,
18 occasional meals, but not training table meals) or meals provided during a prospective student-
19 athlete's official or unofficial visit to the school. Through the bylaws, the NCAA and its member
20 schools have further agreed not to pay for any volunteer coach's housing, health insurance, life
21 insurance, disability insurance, tuition waiver, or other employment benefits that they provide to
22 other coaches and employees, and that the coaches would otherwise receive in a competitive labor

24 ⁴ The bylaws capping the number of coaches and fixing the salary for volunteer coaches at \$0 were adopted upon the
25 recommendation of the NCAA’s “Cost Reduction Committee.” The NCAA established the Cost Reduction Committee
26 to reduce the amount of money its member schools spend on intercollegiate athletics, including on compensation for
27 coaches. The Chairman of the Cost Reduction Committee stated that the Cost Reduction Committee’s objective was,
as its name suggests, to “cut costs and save money.” Among other things, the Cost Reduction Committee determined
that member schools could cut costs and save money by agreeing to limit the amount they would spend on compensation
for coaches.

1 | market.

2 47. Member institutions must comply with these bylaws or face penalties. The NCAA
3 employs a staff to ensure compliance with and to enforce bylaws and other legislation, and it expects
4 the member schools, who likewise have a compliance department, to self-report any instance of
5 noncompliance. Penalties can include fines, scholarship reductions, recruiting restrictions, or even
6 bans from competition. Within the past year, the NCAA has punished schools for violating the
7 volunteer coach rule.

8 48. These unpaid coaches perform all or many of the same duties as the paid coaches,
9 and it can, and often is, a full-time job. During many weeks, for many coaches, it requires more than
10 40 hours of work. During training periods, many volunteer coaches spend hours each workday
11 preparing for practice and working with players before, during, and after practice. During the season,
12 they often spend significant time helping the team prepare for future opponents and assisting in
13 forming strategy plans, and they travel with the team and participate in all team-related activities.
14 Some specialize in overseeing specific aspects of a contest, like offense or defense or particular
15 events. Many volunteer coaches have substantial experience coaching their sports, including as a
16 paid assistant coach or paid head coach at a different school. Because of this experience, their
17 overall skill set, and the hours they dedicate to their work, volunteer coaches add substantial value
18 to their teams and their schools. Whether the volunteer coach works full time, overtime, or part
19 time, they are entitled to be paid; yet the NCAA and its member schools have agreed not to pay
20 them.

21 49. Indeed, the bylaw prevents the coaches from even making the minimum wages
22 required by federal and state wage-and-hour laws. In the absence of this rule, the coaches (who are
23 employees and not exempt from wage-and-hour laws) would at least earn wages in accord with these
24 laws, but in a competitive market, much more.

C. Relevant Market and Market Power

26 50. Because horizontal restraints like the one alleged here involve agreements among
27 competitors not to compete and to instead fix wages to make them unresponsive to a competitive

1 marketplace, they are *per se* unlawful under the Sherman Act. Thus, judgment may be entered
2 against NCAA for the illegal conduct described in this Complaint without defining the particular
3 market that NCAA's conduct has harmed or establishing the NCAA's power in that market.

4 51. Horizontal agreements not to compete in terms of price or wages, like the agreement
5 alleged here, are also properly condemned under "quick look" review, which obviates the need to
6 define the particular market that NCAA's conduct has harmed and obviates the need to establish the
7 NCAA's power in that market.

8 52. Notwithstanding the foregoing, the markets that are relevant to the illegal conduct
9 described in this Complaint are properly defined herein.

10 53. This market is national in scope. The restraint applies to all Division I member
11 schools, and coaches often leave a school in one part of the country to accept employment in another
12 region. Further, the member schools frequently engage in competitive play with other member
13 schools across state lines, and the games are frequently broadcast across state lines.

14 54. NCAA and its member schools have the power to restrain volunteer coach
15 compensation in any way and at any time. In so doing, they do not meaningfully risk diminishing
16 their market dominance. Division I is the only place where coaches can provide their services at
17 the elite, amateur collegiate level. Lower amateur levels are not reasonably comparable; Division
18 II and III schools are less athletically competitive and generally lack the resources and prestige of
19 Division I schools, which the NCAA itself recognizes by separating member schools into Divisions
20 I, II, and III. Professional coaching opportunities are non-existent or extremely limited for the
21 NCAA Division I sports involved in this case, and in any event, the NCAA itself has repeatedly
22 espoused the view that college sports are "a product that is distinct from professional sports."

23 55. Different NCAA rules and restrictions apply to coaches and athletic programs in
24 Division I, as compared with coaches and athletic programs in Division II or Division III. The
25 NCAA publishes a separate 452-page Division I manual, a 359-page Division II manual, and a 239-
26 page Division III manual. In addition, the NCAA imposes different certification and testing
27 requirements on coaches depending on whether they coach in Division I, II, or III. By coaching in

1 | Division I, coaches obtain knowledge and/or certifications that are useful only in Division I.

2 56. Division I coaching jobs provide coaches with the greatest opportunity to coach the
3 highest quality players, to compete against the highest quality opponents, to use the highest quality
4 equipment and training methods, to learn from the best head coaches and fellow assistant coaches,
5 to appear on television, and to develop the skills and credentials necessary to eventually become a
6 Division I head coach.

7 57. The NCAA and its member schools could impose a small but significant and non-
8 transitory reduction in compensation below market rates for Division I coaches without concern
9 about losing a critical mass of coaches to coaching opportunities in Division II, Division III, or
10 elsewhere. Indeed, they have already demonstrated this power by imposing a *total* reduction in
11 compensation for volunteer coaches—*i.e.*, to \$0—yet still retaining coaches and attracting new
12 coaches from Division II and Division III to serve as volunteer coaches.

13 58. The ability of the NCAA and its member schools to impose their wage-fixing scheme
14 on Division I coaches demonstrates their market power.

15 D. Anticompetitive Conduct and Effects

16 59. Since at least 2015, the NCAA's member schools have repeatedly collectively acted
17 to ratify and uphold the bylaws that suppress and fix the wages of volunteer coaches. This conduct
18 results in a restraint on price competition in the labor market between and among member
19 institutions for coaching services, which has had and continues to have a substantially adverse effect
20 on competition in the labor market for these coaches.

21 60. Because horizontal restraints like the one alleged here involve agreements between
22 competitors not to compete, competitive harm can be presumed and judgment may be entered
23 against NCAA for the illegal conduct described in this Complaint without examining the restraint's
24 impact on the market. In the alternative, the wage-fixing conspiracy violates the Sherman Act under
25 "quick look" review or full "rule of reason" analysis, because it restrains trade without any
26 procompetitive justification, or any theoretical pro-competitive justifications are outweighed by the
27 Rule's anticompetitive effects or could be achieved by less competition-restricting means.

1 61. The alleged conduct has anticompetitive effects. The intended and actual result of
2 this wage-fixing conspiracy is to artificially suppress the wages and benefits for volunteer coaches
3 from the market rate to \$0.

4 62. As a result of the wage-fixing conspiracy, plaintiffs and members of the class have
5 been denied the benefits of free and open competition, as the level of their compensation has been
6 fixed at a level below what they would earn in a free and competitive market. Competition has been
7 restricted and lessened. The non-compensation cap does not respond to normal free market forces
8 and volunteer coaches have not had the opportunity to freely negotiate with member schools for
9 services and have been forced to provide services at the fixed and reduced rate of \$0.

10 63. The wage-fixing conspiracy does not promote the retention of entry-level coaching
11 positions. The bylaws do not prevent member schools from hiring experienced coaches to serve as
12 the volunteer coach, and they often do exactly that. Many or most volunteer coaches have
13 substantial coaching experience, either as a volunteer coach or as a paid assistant coach or head
14 coach, including at the Division I level. In any event, any hypothetical desire to create entry-level
15 positions is not in the nature of a pro-competitive justification for the Rule and would not justify
16 fixing the compensation paid to individuals working in those positions, no less at \$0.

17 64. The wage-fixing conspiracy does not meaningfully help maintain competitive
18 balance among the member schools. Numerous factors with a far greater impact on competitive
19 balance than the wages of one assistant coach remain entirely or largely unregulated. The bylaws
20 do not limit the amount of compensation that member schools can provide to their head coach or
21 their paid assistant coaches. The bylaws do not limit the number of employees that member schools
22 may hire to assist their teams in non-coaching roles. Many athletic programs employ (and pay)
23 multiple such non-coach staff members, including directors of operations, video assistants, scouting
24 coordinators, recruiting personnel, and more. The bylaws also do not regulate the amount of money
25 that member schools can spend on facilities and equipment. There is a wide gulf among Division I
26 schools in the use of cutting-edge technologies designed to gather advanced data and improve player
27 or team performance. Furthermore, other than limiting the number of scholarships that member

schools may offer, the bylaws do little to prevent the most talented high-school players from disproportionately attending a relatively small handful of member schools instead of being spread equally among the various member schools to achieve competitive parity.

4 65. In likely recognition of the illegality of the rule, on January 11, 2023, the Council,
5 which includes NCAA member schools, met as part of the 2023 NCAA Convention and voted to
6 eliminate the volunteer coach designation across Division I, instead including those coaches within
7 a new limit for countable coaches in each of the applicable sports. The coaching limit rules are set
8 to take effect July 1, 2023. This change in the bylaws makes clear that even the NCAA does not
9 believe that the wage-fixing scheme is necessary to produce Division I sports, provide entry-level
10 experience, or maintain a competitive balance between member schools.

**COUNT I – Violations of Section 1 of the Sherman Act
(Brought by Plaintiffs on Behalf of the Class)**

13 66. Plaintiffs repeat, re-allege and incorporate by reference the preceding paragraphs of
14 this Complaint as if more fully set forth herein.

15 67. Defendant and others entered into and engaged in unlawful agreements in restraint
16 of the trade and commerce described above. These actions violated and continue to violate Section
17 1 of the Sherman Act, 15 U.S.C. § 1. Since at least four years before the filing of this action, the
18 Defendant's cartel has restrained trade and commerce in violation of Section 1 of the Sherman Act,
19 and the behavior and its consequences continue today.

20 68. This combination and conspiracy by the NCAA and its members schools (which
21 possess a dominant position in the relevant market) has resulted in, and will until restrained continue
22 to result in, anti-competitive effects, including *inter alia*: (a) fixing the compensation of Plaintiffs
23 and the Proposed Class at the artificially low level of zero; and (b) eliminating or suppressing, to a
24 substantial degree, competition among Defendants for skilled labor in the market.

25 69. As a direct and proximate result of Defendant's contract, combination, and
26 conspiracy to restrain trade, suppress salaries, and eliminate competition for skilled labor, Plaintiffs
27 and members of the Proposed Class have suffered injury to their property and have been deprived

1 of the benefits of free and fair competition on the merits. Absent the conspiracy, Plaintiffs and
2 members of the class would have received substantial salary and benefits, commensurate with the
3 salary and benefits received by paid assistant coaches in the same sports at the same member
4 schools, or at a minimum the wages required to be paid by federal and/or state wage-and-hour laws,
5 instead of receiving no compensation for their work.

6 70. As a result, Plaintiffs and the Proposed Class have suffered damages in an amount to
7 be proved at trial.

8 71. Defendant's agreements and conspiratorial acts were authorized, ordered, or done by
9 their respective officers, directors, agents, employees, or representatives while actively engaged in
10 the management of Defendant's affairs.

11 72. Defendant's agreements, combinations, and/or conspiracies violate Section 1 of the
12 Sherman Act, whether under a *per se*, "quick look," or "rule of reason" analysis.

13 73. Plaintiffs and the Proposed Class seek three times their damages caused by
14 Defendant's violations of Section 1 of the Sherman Act, the costs of bringing suit, reasonable
15 attorneys' fees, and a permanent injunction enjoining Defendant from ever again entering into
16 similar agreements in violation of Section 1 of the Sherman Act.

17 **Prayer for Relief**

18 WHEREFORE, Plaintiffs, on their own and on behalf of all other similarly situated
19 persons, seek the following relief:

20 • Certification of the Proposed Class, as set forth above, pursuant to Rule 23 of the
21 Federal Rules of Civil Procedure;

22 • A finding that Defendant has violated Section 1 of the Sherman Act by engaging in
23 an illegal trust, contract, combination, or conspiracy, and that Plaintiffs and class
24 members have been damaged and injured in their business and property as a result
25 of this violation;

26 • A finding that the alleged combinations and conspiracy be adjudged and decreed as
27 violations of the Sherman Act;

- Actual damages in an amount to be determined at trial;
- Treble damages awarded under the Sherman Act to Plaintiffs and class members for the damages sustained by them as a result of Defendant's conduct;
- Pre-judgment and post-judgment interest as permitted by law;
- An injunction enjoining Defendant from continuing or reinstating its unfair and unlawful policies and practices as described within this Complaint;
- Reasonable attorneys' fees and costs of the action;
- Such other relief as the Court shall deem just and proper.

Demand for Jury Trial

Pursuant to Federal Rule of Civil Procedure Rule 38(a), Plaintiffs demand a jury trial as to all issues triable by a jury.

DATED: May 4, 2023

Respectfully submitted,

GUSTAFSON GLUEK PLLC
